Information • The project idea was presented during the initial project innovation poll meeting organized by Mr. Oerlemans on 12 May 2026 at 3:00 p.m. in the room 1.015, NHL Stenden. • During the meeting, the project structure was significantly revised. Instead of focusing on pigeon egg detection and daily records on the app, the project will now focus on breeding management and breeding intelligence under the concept of “Winnest” – Breeding Intelligence Platform. As a result, Mr. Oerlemans needed further discussion with Mr. Pomp before approval can be granted to proceed with the project. • The team leader, Caleb Gaïtou, has sent the project presentation via email to Mr. Pomp and CC Mr. Oerlemans for their discussion. Now, the team is waiting for their approval regarding the initial poll.		
Planning Next Steps • The team will wait for approval until Monday, 19 May 2026. Once approval is granted, the project introduction and further planning will be discussed. • The team leader, Caleb Gaïtou, will send a follow-up email reminder to Mr. Pomp so that the next phase of the project can proceed accordingly.
